

Overcapacity roads. Overcrowded schools that are no longer rated #1 in the state. Vote out the commissioners who are overdeveloping our county.

Commissioner Whitehurst's first 40 votes on new development: he hit the YES button 39 times.

He only spared 12 acres, bulldozed thousands, and wasn't even half way through his term. Then he tried to increase our sales tax by 15% to pay for infrastructure needed for overdevelopment.

Commissioner Dean voted for new development 120 out of 121 times during his first five years in office.

He voted YES to the 5600-home SilverLeaf Expansion, despite overwhelming opposition, then said it would cost taxpayers \$50 million for roads! Dean also tried to raise our sales tax.

Elect the Anns for the majority needed to slow the growth and fight government waste. And NO new taxes.

Ann-Marie Evans and Ann Taylor are both endorsed by Krista Joseph, the only county commissioner who is not funded and controlled by developers.

Challenging Christian Whitehurst

Ann-Marie owned a law firm* and has 7 children; 3 are in our crowded schools. She's the proud wife of a retired police officer. Ann-Marie is currently researching and exposing wasteful spending by county commissioners.

*Admitted to practice law in WA only.

Challenging Henry Dean

Ann has two sons in our schools. She is a former businesswoman of 25 years and is a current HOA board president. A strong advocate, Ann organized a successful community effort to stop children from being bussed away from their home school.
